Remote Control

Bird Control Unit – BCU1511

- To the person in charge of bird control operating on Airside
Provide more efficient equipment to ensure aviation safety.
- It is used in Korea's International Airport.
- It started in 2019 and is offering the latest version in 2024.
- Dual Gas Canon and directional acoustic speakers enable immediate and continuous bird repellency.
- One driver works wirelessly easily.
- The lift moves up and down.
The attack equipment rotates 360° and operates up to 60°.

◇ *Bird Rex wants to upgrade and supply equipment suitable for Indian Airport conditions.*
